2- Haemodialysis solutions  
(concentrated solutions for haemodialysis)

- Concentrated solutions with acetate or lactate:

The concentrations of the components in the solutions are such that after dilution to the stated volume the concentrations of the components per liter are usually in the following ranges.

|                    |         |         |
|--------------------|---------|---------|
|                    | mmol    | mEq.    |
| Na+                | 130-145 | 130-145 |
| K+                 | 0-3     | 0-3     |
| Ca++               | 0-2     | 0-4     |
| Mg++               | 0-1.2   | 0-2.4   |
| Acetate or lactate | 32-45   | 32-45   |
| Cl-                | 90-120  | 90-120  |
| Glucose            | 0.12    |         |

Concentrated solutions with acetate or lactate are diluted before use
